```javascript
const oracledb = require('oracledb');
require('dotenv').config();

async function connectDB() {
  try {
    const connection = await oracledb.getConnection({
      user: process.env.DB_USER,
      password: process.env.DB_PASS,
      connectString: process.env.DB_CONNECT,
    });
    console.log("✅ Oracle Database connected");
    return connection;
  } catch (err) {
    console.error("❌ Oracle connection failed:", err);
  }
}

module.exports = connectDB;
```
